

THE ISSUE OF THE SOURCE OF EDUCATION IN THE LIGHT OF THE QUR'AN AND HADITH

Ishtiaq Ahmad
ucms khanewal

Abstract:

It has been more than half a century since Pakistan became independent but unfortunately we are still confused and confused in the confusion of the question of what should be the education system of Pakistan. At the same time solved and today they are walking on the highways of development and prosperity with great confidence and pride and on the contrary we are begging in front of the whole world and in return our national pride, They are selling national civilization, ego, dignity, self and self esteem. However, the Prophet (peace and blessings of Allaah be upon him) said that the upper hand is better than the lower hand and the lower hand is the beggar. Our hand is down because our education system is outdated, rotten and made up of foreign masters. The education system, nurtured by the thought and thought of Lord Macaulay, brings to the fore the less than one per cent class, a class to be rewarded in exchange for English slavery, whose interests would be met by depriving ninety-nine per cent of the people of backwardness and education. Are This system of education was developed not by the patriots but by Lord Macaulay, whose essence is to prevent the people of the subcontinent from being educated in their language. With this, they will automatically become your slaves and subjugated.

Introduction:

Our education system is a mirror of unbridled and ever-changing educational policies. This system only produces parrots. The understanding of science and art is stifled. Cuts the roots of national identity. The door to research and creation closes on us forever. It pushes the new generation into such a deep sea of misery where all avenues except drowning are closed.

The Qur'an is the most truthful and workable book in the world, the commands of which are in accordance with the human psyche. Let's find a solution to our problem with this book of guidance. In Surah Ibrahim, Allah, the Lord of Glory, says: If God had not sent messengers in the language of people, people would have said that this person is not one of us and we do not understand his words, therefore he cannot be our messenger. It is very clear from this verse that the matter is understood only in the language of one's own nation. This command of Allah gives us very clear and unambiguous guidance on curriculum development and teaching methods. It is a pity that all non-Muslim developed nations adhere strictly to this principle of the Qur'an, but it is a pity that we are not leaving any stone unturned in spreading the word of God. What a beautiful map the poet of the East has drawn of our humiliation and disgrace

He was honored to be a Muslim in those days

And you have forgotten the Qur'an

In addition, in Sahih Bukhari, the Prophet (peace and blessings of Allaah be upon him) said, "Make it easy, do not put it in difficulty." It also helps to resolve the issue of our education system and the source of education. Our textbooks and extracurricular books should be in a language that is easy to read and teach and can be the national and mother tongue of a nation.

On another occasion, the beloved Prophet (peace and blessings of Allaah be upon him) said, "Speak according to the mental level of the people." Will create interest and will be easier to understand and communicate. Our religion makes things easy for us in every matter but we have deviated from it and trapped the whole nation in self-made difficulties. Neither the child understands anything nor the teacher understands anything. The biggest reason for this is that we do not obey the Qur'an or the author of the Qur'an. Then why don't humiliation and disgrace become our destiny. Why should not the disobedient people of God and His Messenger be punished in the form of earthquakes and floods?

If we want to correct our education system, we have to change ourselves, according to Maulana Zafar Ali Khan who presents the translation of Qur'anic verses in a systematic way that

God has not changed the condition of this nation till today

Don't worry about changing your situation

Islam is the religion of nature and the nation of Prophet Hashmi is special in its composition. Just as Islamic teachings command us to distribute food from the right hand and from right to left. Allah has placed the same mood, order and composition in the script of the majority of Muslim languages that we write from right to left. Nations thrive on this cultural harmony. A nation that forgets its culture and script also loses knowledge and art. Why are the doors of education, research and creation closed on us today? Because we have forgotten our true values. If we return to our origins, the great research and scholarly centers of Baghdad and Spain will be re-established to guide the Muslim Ummah. Let the intellectual abode and orphanhood of the Ummah be turned into self-reliance again.

Today, if we begin the work of translating the sciences and arts of the world into our language with a jihadi spirit, the day is not far when our libraries will be filled with our own people and books written in our own language. This will be the starting point for our self-reliance and development. Someone in the world An example cannot be given of a nation which has opened the door to development, research and creation and invention without doing this.

This is the prescription of alchemy by which every nation of the world has achieved progress and prosperity, but the imperialist powers do not allow us to follow this prescription by trapping us at the expense of wealth and civilization shining from afar. - By God, just as the sun does not rise in the west and set in the east, so we cannot touch the path of progress by adopting unnatural teaching methods. The day we get out of this deception, understand that the ruler of the world will come to us again. Let us resolve to walk on this straight path and use all our abilities in our efforts to regain our lost wealth.
